**GOLDEN FAIRY.** White petals with yellow disk.

**VALENCIA.** Orchid pink single, one of the best for garden or cutting.

## 'MUMS ARE EASY TO GROW!

Set your plants at least three feet apart for best results, and staking should be done early. 'Mums are heavy feeders and drinkers, but do not keep the ground soggy. Soil should be previously enriched if possible, but if not, light applications of a good mixed fertilizer should be applied until buds show color. Use an all-purpose dust or spray to keep your plants free from pests and disease. They may be pinched back early to encourage bushiness, and depending on your desires as to size of flowers, etc., the plants may be cut back as late as July.

'Mums have a blooming season beginning from the middle to last of October, through November and into December.
